GRIND & PROSPER HOSPITALITY · COCO MAYA BY MISS B'S · LITTLE ITALY, SAN DIEGO

August 2026 Performance Report

How Coco Maya performed in August, and how much has changed since we took over the Google Business Profile in May and launched the new website in July.

Prepared by Lilos Growth

May 1, 2026	Jul 17, 2026	August 2026
Lilos Growth begins Google Business Profile management and optimization.	New website launches at inlovewiththecoco.com.	Report month, the first full month on the new site.

01 · SUMMARY

August at a glance

+69% — **More online reservations**

Coco Maya averaged 39.8 online reservations a day in August, up from 23.6 before we started. August was the highest month on record in Toast Tables.

August vs. Mar–Apr 2026 · per day · Toast Tables

+80% — **More first-page Google rankings**

The website now ranks in Google's top 10 for 171 searches that don't include the Coco Maya name, up from 95. The biggest gains are in event venue, happy hour, rooftop, and Little Italy searches.

Jul 17–Sep 24 vs. May 9–Jul 16 · Search Console

+26% — **More guests through the door**

Total guests averaged 387 a day in August, up from 307 in March and April. Online reservations grew faster than total guests, so more of the restaurant's business now starts online.

August vs. Mar–Apr 2026 · per day · Toast POS

+41% — **More private event inquiries**

65 event inquiries came in during the 10 weeks after the new site launched, up from 46 in the 10 weeks before. September has been the strongest stretch so far.

70 days after launch vs. 70 days before · Toast leads

Scorecard

Each row states what was measured and what it is compared with. Restaurant and Google profile figures compare August with **March–April 2026**, the last two months before our work began. Website and event figures compare equal windows **before and after the July 17 launch**.

WHAT WE MEASURED	AUGUST 2026	COMPARED WITH	CHANGE
IN THE RESTAURANT · AUGUST VS. MAR–APR, PER DAY			
Total guests, all channels Toast POS	**11,992** **387 a day**	307 a day	+26%
Online reservations made Google, website, Local by Toast	**1,235** **39.8 a day**	23.6 a day	+69%
Guests on online reservations Total party size of those bookings	**5,041** **163 a day**	87 a day	+87%

WHAT WE MEASURED	AUGUST 2026	COMPARED WITH	CHANGE
GOOGLE BUSINESS PROFILE · AUGUST VS. MAR–APR			
Non-branded searches that showed the profile	**4,188**	3,365 a month	+24%
Actions taken on the profile Website, directions, calls, menu, bookings	**5,921*** 191 a day	170 a day	+13%
Direction requests	**1,563** 50.4 a day	37.7 a day	+34%
WEBSITE & GOOGLE SEARCH · JUL 17–SEP 24 VS. MAY 9–JUL 16 (10 WEEKS EACH)			
Non-branded searches ranking in Google's top 10	**171**	95	+80%
Clicks from non-branded searches	**542**	412	+32%
Times the site appeared in non-branded searches	**37,290**	29,986	+24%
Search clicks to pages beyond the homepage	**448**	162	2.8×
PRIVATE EVENTS · JUL 17–SEP 24 VS. MAY 8–JUL 16 (10 WEEKS EACH)			
Private event inquiries	**65**	46	+41%

* Google's booking count for August was hit by a reporting outage (about Aug 3–26). August bookings use the June–July average; see section 04. Website and event figures run through September 24 to give the new site a full ten weeks to rank.

On seasonality: Coco Maya's reservation data starts in March 2026, when the restaurant moved to Toast Tables, so there is no year-over-year reservation comparison yet. Some spring-to-summer growth is seasonal. A 2025 guest-count comparison from Toast POS is in progress.

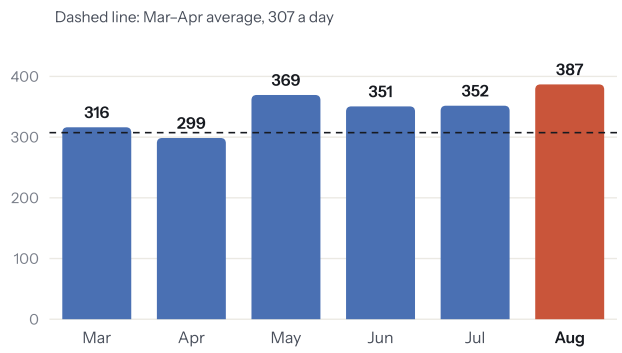

02 · RESTAURANT PERFORMANCE

Guests and online reservations

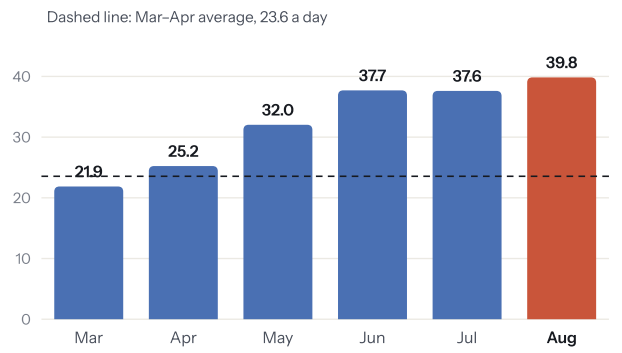

Guests counted in the restaurant, and reservations made online through Google, the website, and the Local by Toast app.

Measured: per day, by month · **Baseline:** March–April 2026 average

Total guests per day

Online reservations made per day

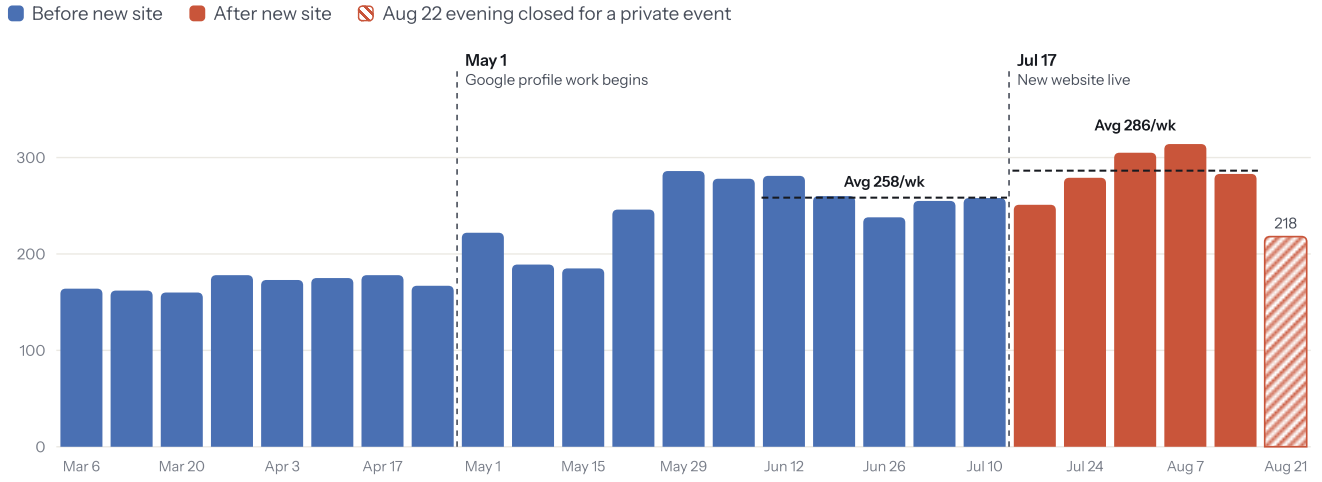

MONTH	TOTAL GUESTS	GUESTS VS. BASELINE	ONLINE RESERVATIONS	RESERVATIONS VS. BASELINE
March	9,486 316 a day	Baseline	656 21.9 a day	Baseline
April	8,956 299 a day	Baseline	757 25.2 a day	Baseline
May	11,452 369 a day	+20%	993 32.0 a day	+36%
June	10,518 351 a day	+14%	1,131 37.7 a day	+60%
July	10,904 352 a day	+14%	1,166 37.6 a day	+60%
August REPORT MONTH	11,992 387 a day	+26%	1,235 39.8 a day	+69%

Changes compare daily averages so months of different lengths line up. March covers Mar 2–31.

Before and after the new website

Weekly online reservations. Both 5-week windows fall after Google profile work began, so the website is the main change we made between them.

	5 WEEKS BEFORE Jun 12 – Jul 16	5 WEEKS AFTER Jul 17 – Aug 20	CHANGE
Online reservations	1,292	1,432	+10.8%
Weekly average	258	286	+28 a week
Guests on those reservations	5,458	5,885	+7.8%
Best week	281	314	+33

Aug 21–27 is left out of the comparison because Saturday evening was closed for a private event. It still appears on the chart (218 reservations).

03 · SEARCH RANKINGS

Getting found by people who aren't searching for Coco Maya

Non-branded searches are the ones that don't include the restaurant's name, like "rooftop event space san diego" or "happy hour little italy." These are people deciding where to go, and they are the new customers a restaurant wants to reach. Ranking for them has been a main focus of the new website.

Measured: Google Search Console, non-branded searches only · **Compared:** Jul 17–Sep 24 (after launch) vs. May 9–Jul 16 (before)

Searches in Google's top 10	Searches new to page one	Clicks to the website	Times shown in Google results
171 was 95	**64**	**542**	**37,290**
+76 searches (+80%)	since launch	+32% from 412	+24% from 29,986

Gains by search topic

TOPIC	SEARCHES IN TOP 10 BEFORE → AFTER	AVERAGE POSITION BEFORE → AFTER	CLICKS BEFORE → AFTER
Private events & groups Venues, bachelorette, birthday, rehearsal dinner	2 → **32**	14.1 → **11.4**	6 → **26**
Happy hour	2 → **10**	16.1 → **10.9**	32 → **64**
Rooftop	20 → **34**	11.5 → **9.5**	58 → **68**
Little Italy	51 → **77**	12.4 → **11.4**	191 → **311**
Restaurants & dinner	29 → **49**	18.7 → **18.2**	135 → **154**
Brunch	26 → **33**	14.3 → **13.1**	146 → **173**

Position is where the site ranked on average; a lower number is higher on the page, and positions 1–10 are page one. Topics overlap, so a search like "little italy happy hour" counts in both. Across all non-branded searches, average position improved from 15.8 to 14.6.

Impressions are the number of times the site appeared in Google results for that search. Many of these searches are new to the site's rankings, so clicks are still building; they usually follow as positions keep climbing.

Also tracked by Semrush

Semrush is an independent rank-tracking tool. Its estimates back up what Search Console shows, and add one thing Search Console can't: whether Google's AI answers mention Coco Maya.

Searches where the site ranks in the top 3

~40 was ~22

About double since May

Searches where Google's AI Overview cites the site

18 was 0–2

New since launch most added Jul–Sep

Semrush data, May vs. September 2026. Semrush estimates rankings from its own keyword sample and includes branded searches, so its counts differ from the Search Console figures above. Values are read from Semrush trend charts and rounded.

New pages now bringing in search traffic

The new site added guides built around specific occasions. Each one gives Google another reason to show Coco Maya for a non-branded search. Search clicks to pages other than the homepage rose

from 162 to 448.

Best happy hour in Little Italy | Rooftop bars in Little Italy | Rooftop birthday party venues | Date night in Little Italy | Patio dining in Little Italy | Best restaurants in Little Italy | Private event venues | Bachelorette party guide | Rehearsal dinner restaurants | Things to do in Little Italy | Menu | Brunch

04 · GOOGLE BUSINESS PROFILE

How people found and used the Google profile

For a restaurant, the Google profile is the front door. It is where most people see hours, photos, and the menu, and where many decide to book or get directions.

Measured: Google Business Profile Performance data, by month · **Baseline:** March–April 2026, before our work began

Non-branded searches that showed the profile

SEARCH TOPIC	APRIL	AUGUST	CHANGE
Bars	1,480	2,174	+47%
Occasions Date night, birthday, girl dinner	235	370	+57%
Dinner & lunch	398	558	+40%
Cocktails & drinks	108	211	+95%
Happy hour & rooftop Happy hour paused Jun–Aug at Coco Maya's request	909	875	−4%
Total	**3,130**	**4,188**	+34%

April is the month before our profile work began. Against the March–April average (3,365 a month), August is up 24%. Branded searches are excluded, and Google doesn't report terms with fewer than 15 searches a month.

Actions taken on the profile

MONTH	WEBSITE CLICKS	DIRECTIONS	CALLS	MENU VIEWS	BOOKINGS	TOTAL
March	2,157	1,236	481	1,318	169	**5,361**

MONTH	WEBSITE CLICKS	DIRECTIONS	CALLS	MENU VIEWS	BOOKINGS	TOTAL
April	2,080	1,064	362	1,263	216	**4,985**
May	2,156	1,355	578	1,669	336	**6,094**
June	1,936	1,349	358	1,486	380	**5,509**
July	1,897	1,283	508	1,439	355	**5,482**
August	2,114	1,563	364	1,512	368*	**5,921***
August vs. Mar–Apr per day	-2%	+34%	-15%	+15%	+88%*	+13%*

Direction requests, menu views, and bookings grew the most, which are the actions closest to a visit. Website clicks held level and calls were lower.

About August bookings: Google's dashboard shows only 162 bookings for August because of a Google reporting outage from about August 3 to 26. Bookings still came in. Toast recorded the most online reservations of any month (section 02). This report uses the June–July average of 368 so the August figure reflects what actually happened. If you check the Google dashboard and see a low number, this is why.

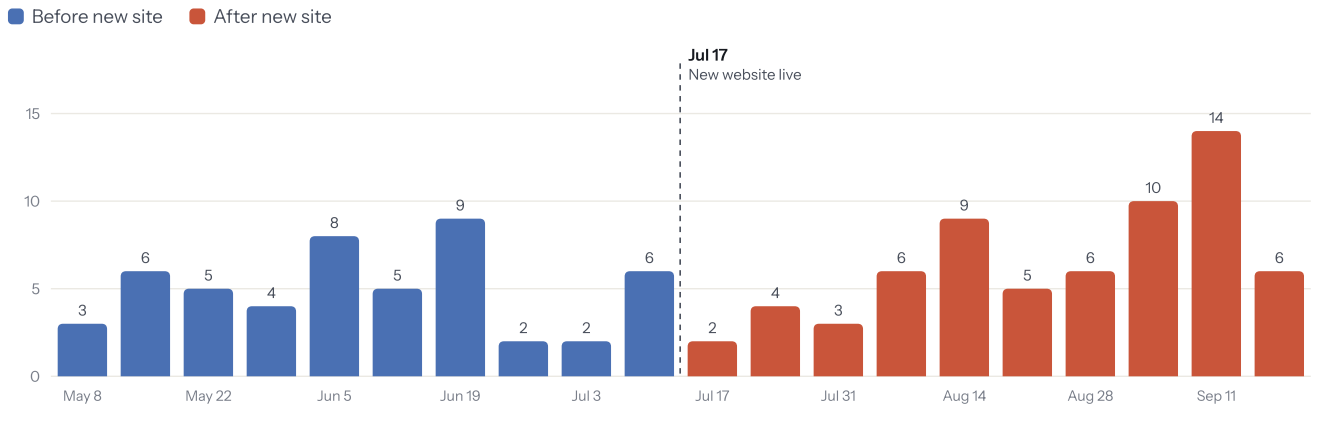

05 · PRIVATE EVENTS

Private event inquiries

Inquiries submitted for private events at Coco Maya, before and after the new website with its dedicated event pages.

Measured: Toast private event inquiries, by date received · **Compared:** Jul 17–Sep 24 vs. May 8–Jul 16 (70 days each)

	70 DAYS BEFORE	70 DAYS AFTER	CHANGE
Event inquiries	46	65	+41%
Inquiries per week	4.6	6.5	+1.9 a week

Weeks run Friday to Thursday. New pages usually take several weeks to rank. Inquiries held steady for the first seven weeks after launch, then rose in September, with 10 and 14 inquiries in the weeks of Sep 4 and Sep 11.

---

06 · LOOKING AHEAD

September priorities

What we're building next to keep growing reservations, event inquiries, and non-branded search visibility.

PRIVATE EVENTS

Keep event inquiries climbing

Build on September's momentum, the strongest stretch for inquiries so far, by strengthening the private events pages and the paths that lead guests to the inquiry form.

NEW CONTENT

Holiday party pages

New content for company and group holiday parties, published ahead of the November and December booking season so it has time to rank.

NEW CONTENT

Convention and business travelers

Content for convention attendees and business travelers in San Diego looking for group dinners, team events, and drinks after the conference day.

SEARCH RANKINGS

More high-intent, high-volume searches

Optimize the pages already ranking to move them higher, and add new dinner and event content to reach more of the searches people use when deciding where to go.

Also watching

- **Happy hour is back.** It returned to the website and Google profile in September, so happy hour searches, the one flat topic in section 04, should recover.
- **Google booking counts.** Google's figure is still under-reporting. Toast remains the source of truth for reservations until it recovers.
- **Year-over-year guests.** A 2025 vs. 2026 guest comparison from Toast POS is in progress and will separate seasonal growth from new growth.

Notes and definitions

- **Online reservations** are reservations made through Reserve with Google, the website booking widget, and the Local by Toast app, from the Toast Tables export. Walk-ins, waitlist, phone, and host-entered reservations are not included. They are counted by the date the reservation was made, and include every reservation made, before cancellations.
- **Guests on online reservations** is the total party size of those bookings, for any dining date. It will not match the Toast POS guest count.
- **Total guests** is the Toast POS guest count (Location Overview report), all channels.
- **Baseline:** Coco Maya moved to Toast Tables on March 2, 2026, so reservation data starts there. March–April is the last full period before Google profile work began on May 1.
- **Weekly chart:** weeks run Friday to Thursday so each holds one full weekend. Partial weeks at each end (Mar 2–5, Aug 28–31) are in the monthly figures but not on the weekly chart.
- **Google reporting outage:** from about August 3, Toast labeled most Google bookings as website bookings, and Google's Bookings figure dropped to near zero. Total online reservations were not affected.
- **Profile actions and searches** come from the Google Business Profile Performance API. Totals can differ slightly from the dashboard. Search topics are grouped by the words in each search.
- **Website search** comes from Google Search Console (web search), Jul 17–Sep 24 vs. May 9–Jul 16. Google withholds some low-volume searches, so non-branded figures are a subset of all clicks. Branded means the search includes Coco Maya (and misspellings) or Miss B's. Top 10 counts searches with at least 20 impressions and an average position of 10 or better. Clicks beyond the homepage come from the Pages report, which includes branded searches.
- **Semrush** figures are Semrush's organic position estimates for inlovewiththecoco.com, May vs. September 2026, read from its trend charts. They include branded searches.
- **Event inquiries** are Toast leads of type "Private Events – Coco Maya," by date received, Pacific time. Large party reservations are not included.
- **Private event, Aug 22:** Saturday afternoon and evening were closed for a private event, which lowered reservations that week and for August overall.
